VIBRATING SCREEN

INTRODUCTION

YK series circular vibrating screen is mainly composed of motor transmission part, intermediate shaft parts, flexible couplings, exciter components, screen frame components and other parts.

It is an important device in the crushing and screening production line. Vibrating screen machine is used to divide the mixed different sizes aggregates and sand into separate different sizes. According to the different kinds of sizes aggregates, we can manufacture the vibrating screen machine to double deck vibrating screen, 3 deck vibrating screen and 4 deck vibrating screen.

ADVANTAGES

1. The structure is advanced and the operation is reliable; the structure adopts the cylindrical vibration exciter and the partial block adjustment device, and the advanced rivet-connected assembled frame structure improves the service life of the equipment.
2. An intermediate transition bearing seat is added to the transmission part. The application of the intermediate transition bearing seat effectively protects the motor and prolongs the service life of the motor.
3. The screening efficiency is high. Due to the strong vibration of the vibrating screen machine, the phenomenon of material blocking the screen holes is reduced, so that the screen has high screening efficiency and productivity.

TECHNICAL DATA

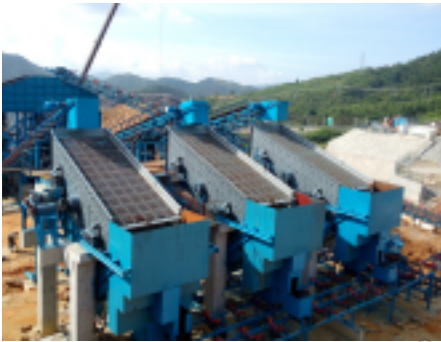

Vibrating Screen

Model	Qty. of screen mesh	Screen mesh size (m ²)	Frequency (r/min)	Double-amplitude (mm)	Process capacity (m ³ /h)	Motor power (kW)	Overall dimension (L×W×H)(mm)

WHY CHOOSE HAMAC?

HAMAC Automation Equipment Co., Ltd is a professional supplier for construction machinery located in Zhengzhou and Qingdao, China. Based on the two manufacture bases, HAMAC's Parent company occupies big market in domestic market, and built agents and distributors in China mainland. HAMAC is treated as an international brand to promote the overseas market. We are becoming a famous global brand in construction machinery industry.

HAMAC owns a strict quality control system to select our suppliers, to check all the products from HAMAC also; HAMAC does not pursue a high profit, but with reasonable profits to cover basic cost and to confirm the quality; HAMAC provides our clients with professional exporting service more than products, to make your purchase experience satisfied.
